

## THE FUTURE OF ELECTRONIC VOTING IS HERE:

### EVM LEADER VOTRITE RECEIVES SEC APPROVAL TO WIDEN INDUSTRY REACH

Boca Raton, FL (April 3rd, 2025) - As current election processes come under increased scrutiny, the demand for innovation and transparency in the electronic voting machine sector has never been greater.

Florida's VotRite, developers of industry-changing voting machines that prioritize security while not sacrificing voter convenience, has officially received approval from the U.S. Securities and Exchange Commission, paving the way for future connections with investors and leaders across the nation.

"Since its founding, the SEC has dedicated itself to preserving fair markets, protecting investors, and enforcing federal securities laws to ensure honesty and transparency from businesses," stated Angelica Kapsis, VotRite President and Co-Founder. "These are values our team shares, and they are what has motivated us from the beginning."

Kapsis added, "This approval from the SEC is a tremendous step forward for VotRite. As we continue the development of voting technology that aligns with updated Election Assistance Commission (EAC) guidelines, we need to garner increased public support and capital to further our goals. Future investors will now be able to view our records, cementing their trust in our company and helping us bring the future of secure, accessible voting to life."

The recent winner of Global Tech Insider Awards 'category of 'Most Trusted E-Voting System for Organizations - Florida 2025', VotRite will soon be launching its first pilot program.

#### More About VotRite:

Led by President Angelica Kapsis and CEO Jim Kapsis, VotRite is a trailblazer in electronic voting technology. VotRite's customized hardware and software technology provides cost-effective, user-friendly, and environmentally conscious voting solutions, and the company has worked diligently to ensure the machine's security through the use of individual databases, Direct-Recording Electronic (DRE) technology, and Voter-Verified Paper Audit Trail (VVPAT).

Additionally, VotRite's machines do not use hackable downloads, emails, usernames, or passwords, preventing sensitive data from being taken hostage.

CEO Jim Kapsis has extensive management and technology capabilities as the leader of various voting companies in the last 30 years. He has created two patents for voting integration and copyright software. President Angelica Kapsis has a wealth of experience working with voters with disabilities and is fervently committed to ensuring that everyone gets the right to vote in order to foster cohesion and success in both the community and the individual. She is also a U.S. Navy veteran.

Christopher Baum is the company's Chief Compliance Officer. He has spent more than 30 years delivering high-quality IT analysis and services on the use of technology in government and in the election industry in particular. Christopher manages certification processes and election integrity.

VotRite has received numerous honors, including:

- 2024 Education and Training Awards (Corporate Vision nomination)
- 2024 Technology Innovator Awards (Innovation in Business nomination)
- 2024 Best Voting Technology Development Company Award (Innovation in Business nomination)
- 2024 Female Employee of the Year (Silver Stevie Awards winner)
- 2025 Most Trusted E-Voting System for Organizations – Florida 2025
- Global Tech Insider Awards winner
